	F	G	H	I	J	K	L	M
3	Fashion	FALSE	Standard price	15	US	FEB-US		
4	Kitchen	FALSE	Standard price	03	US	MAR-US	Sum, Count, and Average	
5	Electronics	High price	FALSE	11	US	APR-US	Calculate the total price of all products in the dataset.	
6	Outdoor	FALSE	Standard price	22	US	MAY-US	\$10,100.00	SUM(D2:D35)
7	Electronics	FALSE	Standard price	07	UK	JUN-UK	Determine how many products exist in the dataset.	
8	Fashion	FALSE	Standard price	19	UK	JUL-UK	34	COUNT(A2:A35)
9	Kitchen	FALSE	Standard price	23	UK	AUG-UK	34	COUNTA(A2:A35)
10	Electronics	High price	FALSE	05	UK	SEP-UK	Calculate the average price of the products.	
11	Outdoor	FALSE	Standard price	14	UK	OCT-UK	\$297.06	AVERAGE(D2:D35)
12	Electronics	High price	FALSE	17	IN	JUN-IN	Minimum and Maximum Values	
13	Fashion	FALSE	Standard price	25	AU	NOV-AU	Identify the minimum price among all products.	
14	Kitchen	FALSE	Standard price	08	DE	DEC-DE	\$30.00	MIN(D2:D35)
15	Electronics	FALSE	Standard price	18	CA	FEB-CA	Identify the maximum price among all products.	
16	Electronics	FALSE	Standard price	16	ES	APR-ES	\$1,000.00	MAX(D2:D35)
17	Accessories	FALSE	Standard price	21	CA	AUG-CA	Logical Function – IF	
18	Electronics	FALSE	Standard price	20	CN	AUG-CN	If Price ≥ \$500 → classify as High Price	IF(D2>=500,"High price")
19	Electronics	High price	FALSE	27	IT	JAN-IT	If Price < \$500 → classify as Standard Price	IF(D2<500,"Standard price")
20	Fashion	FALSE	Standard price	01	UK	MAR-UK	Conditional Functions – SUMIF and COUNTIF	
21	Outdoor	FALSE	Standard price	14	US	AUG-US	Use the SUMIF function to calculate the total price of products in the Electronics category.	
22	Electronics	High price	FALSE	14	RU	MAY-RU	\$8,050.00	SUMIF(F2:F35,"Electronics",D2:D35)
23	Kitchen	FALSE	Standard price	09	CA	JAN-CA	Use the COUNTIF function to determine the number of products with a price	
24	Electronics	FALSE	Standard price	19	BR	JUL-BR	\$s than \$100.
